1T-MV-8474 [4K Multiviewer]

Released by: David Reynaga

New

- READ Commands added to API Command set allowing
 - read back of current status
 - validating if WRITE command has been successful
- Audio Output behavior summary

WEB GUI/API Volume setting	Analogue Audio OUT	HDMI Audio Out
5	1:1 (no attenuation)	10dB attenuation
10	+10dB	1:1 (no attenuation)

Fixed

- Layout1 had the following bug:

when video input for Window B is changed, input for Window A also changed. Same effect appeared on other Windows: i.e. changing input on Window C changes input on D. Bug was only active when Layout1 was selected. Input selection on other layouts work correctly. Firmware release fixes this layout-1 isolated bug.

- Selecting Layout 4, assign a source and select Layout1 had the following bug:
 - Assign one video input to all Windows-A, B, C, D.
 - Select Layout-4
 - Now assign Source-1 to Window-A
 - Select Layout-1

Unit displayed HDMI input but also 'VGA not connected' is displayed.

Firmware release fixes this bug.
