CORIOdiscover (v1.7.2.2)

Released by: Neil Baptiste   14/Feb/2020

New

- CORIOmaster2 (CM2-547) devices are now supported
  - Firmware variant "G" can now be installed on a CM2-547 device
- CORIOview devices will now exit standby in order to perform a firmware update
  - This applies to CORIOview devices running firmware M409 or later
- CORIOdiscover command line interface (CLI) has been added
  - For usage instructions, from Windows command prompt, run:
    C:\Program Files (x86)\TV One\CORIOdiscover\CORIOdiscover.CLI.exe -h
- Custom resolutions are not limited to 20. The number of available custom resolutions is now determined by the device firmware

Fixed

- None

Notes

- None
