CORIOgrapher™ (v3.0.2.7)

New Features & Functions for CORIOmaster2 M500_00 and above only

New canvas editor and layout:

- There are a lot of great new UI improvements and enhancements in this new CORIOgrapher release, for a full description please read the instruction manual or the Online help " **?** " from CORIOgrapher v3.0

Fixed

- CORIOgrapher v3.0 cannot set the network time.

Notes

Known issues:

- User is able to select all resolutions on AVIP (Media card) channel 2, only 1080p60 is supported.
- Sending settings from CORIOgrapher 3.0 Target slows down over time if the console window is open.
- Encoder Manager dialog uses tabs and the tab default behaviour changes the selected tab highlight when the mouse of over child items.
- Third-party ColorPicker control is difficult to customise so the Advanced section has some dark text on a dark background.
- Application Window title bar is not themed, will do at some point just takes a bit of time to duplicate the existing look and behaviour correctly.
- Canvas Cut-to-black will overwrite the current output cut-to-black and canvas audio mute values. The hope is to have this behaviour supported by the firmware in a later release, so the current values can be maintained.
