CORIOgrapher v3.5.3.1

Released by: Neil Baptiste

22-Sep-22

[New Features]

- Added support for Window Keying in CORIOmaster2.
 - Enable window keying options for all CM2 windows.

- CM2 window keying
 - Add support for new CM2 KeyingEnabled property. Turn keying on or off for a window.
 - Still maintain KeyingLayer for C3 products but keep UI looking the same.

Please refer to the manual for full instructions on how to use this new feature.

Fixed

- None

Notes

Known Issues:

- If you are installing CORIOgrapher v3.2 and already have CORIOgrapher v2.9 installed, then double clicking a CMC config file may still open in v2.9. If the CMC files do not automatically register to v3.2 you can change this by right clicking the file, selecting Open with..., and then choosing CORIOgrapher v3.2 from the list.
- Encoder Manager dialog uses tabs and the tab default behavior changes the selected tab highlight when the mouse hovers over child items.
- Application Window title bar is not themed.
- Changing pixel clock on an active custom resolution has no effect.
- Canvas Cut-to-black will overwrite the current output cut-to-black and canvas audio mute values, which means the previous values cannot be restored.
