RELEASE NOTES

PROJECT NAME	RELEASED BY	VERSION NUMBERS	RELEASE DATE
CORIOdiscover	David Reynaga	1.1.1.5	22nd Oct 2015

DESCRIPTION

- This new installation add some small but useful features to provide better user feedback during operation.

DEFECTS RESOLVED

Changes since 1.1.1.4:
- Bug 802240 - Cannot update to firmware with a letter in the minor version number
- Bug 801724 - I have no idea if an upload of the Firmware file is working or not
- Fixed a problem with number boxes not aligning all the way to the right of the edit area when editing a custom resolution

NEW FEATURES

- Display details on bytes sent during the file sending stage of a firmware update (see bug 802240)
- Only show the Option buttons once a device has been selected
- Added a scroll bar to the list of discovered devices
- Added a generic exception handler so that all errors will show the update has failed

KNOWN ISSUES

- **Will not work on Windows XP**.

INSTALLATION INSTRUCTIONS

Simply run the application – system will auto detect CORIOmaster / CORIOmaster mini / CORIOmatrix / CORIOmatrix mini
